

ASUS X515M (SILBER)

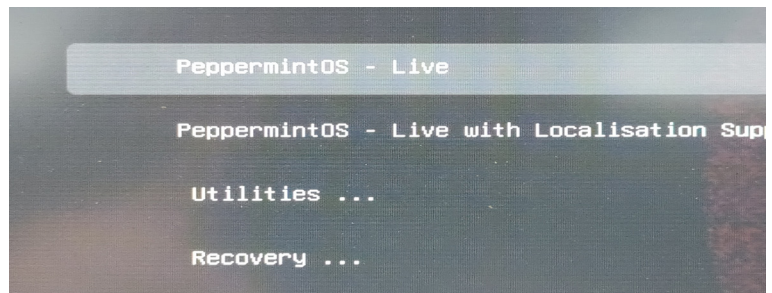

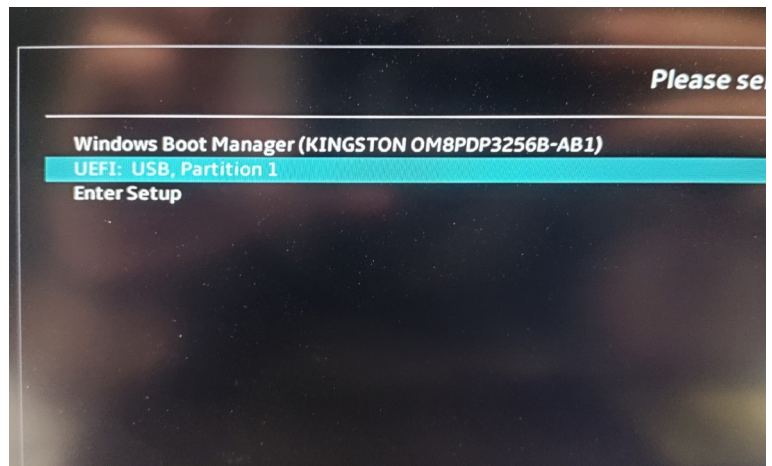

STARTUP LAPTOP

Booting up the laptop (to Ubuntu, **NOT WINDOWS**):

1. Press the power button and *immediately..*
2. ..hit the **ESC** key until the display shows "Please wait"
3. With the arrow keys select "**UEFI: USB, Partition 1**" and hit enter.
4. Select "**PeppermintOS - Live**" and hit enter

Note **Shutdown**: Bottom left there is the main menu, go to **Logout** → select **Power off**.

Do **NOT** disconnect the USB Stick (this is the operating system).

EDDY-G APPLICATION

After starting up, the software "**Eddy-G**" is running.

To go to Fullscreen, hit **F11**, then click on "**htmlDesktop**" or "Greenscreen".

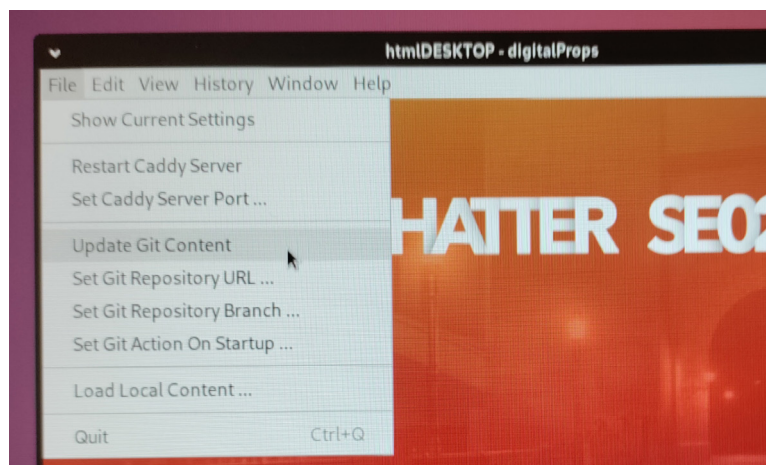

CONTENT UPDATE

Eddy-G may need updates due to changes. To update it, connect to a wireless internet connection (top right while not in Eddy-G).

Without being fullscreen, select **File** and click "**Update git content**" [G]. After a few seconds, the new update should be installed.

If the screen stays white or the loading screen takes ages, close and restart the Eddy-G application.

If the date on the bottom of the index site is not a new one, try "**View**" → "**Force reload**" or restart the application.
